7.3 Best Practices

7.3.1 Elaborate on any two best practices in the given format at page no. 98, which have contributed to the achievement of the Institutional Objectives and/or contributed to the Quality improvement of the core activities of the college

Best Practice – I

1) Title: - Best Student Awards: -

2) Goal and Objectives: -

- 1) To create competition among the student for marks.
- 2) To Encourage Student Participation in Extracurricular activities, like NSS, Sports and Cultural Program.
- 3) To increase regularity of student in college
- 4) To improve behaviour of Students.
- 5) To create Social and National Responsibilities in student.
- 6) To overall progress of student.
- 7) For Developed Good habits in student for moral and spiritual development.
- 8) To create Sport Activity in students.
- 9) For attendance.

3) The context: -

To create a competition among students to achieve good things which are helpful to all over development of student, like Marks in Examination, Performance in sports, cultural activities, National Service Scheme and other activities. For the Selection of best student some criteria have been followed such as his/her participation in sports, cultural activities, National Service Scheme & other activities, his behaviour, his attendance in college, his all over performance in a college and who acquire maximum marks selected for the 'Best Student Award'. In session 2017-18 Ku.Amruta Pimpale won this award.

4) The practice: -

From some year our Institution Started the Best Student Award Practice there is curiosity among student about the Best Student Award. Every student wants to get this award and for that every student trying. Because of this award competition

creates good habits in students. Changes come in to student behaviour in student. Student gives attention to study. They attend all lecturer, take part in sports, cultural, National Service Scheme and extracurricular activities.

The committee have been established in our institution selection of best student. For selection best student some criteria have been followed such as his/her marks in university exam, participation in sports, cultural activities, other activities, his behaviour, his attendants in college, his all over performances in college. Every criterion has some weightage. Who acquire maximum total marks in all criteria select for the best student award.in the session 2017-2018 Ku.Amruta Mukundrao Pimple select for best student award. In the annual gathering of the college declared this award.

5) Evidence of success: -

- 1) The College has successfully implemented the practice.
- 2) Good marks in university examination is the first criteria for selection it affects the student increase marks in exam it can seen in passing percentage and also total marks.
- 3) Participation in sports is one of the criteria so participation of student is increase and many students select university and state level sports. One student of our college
Select for state level Ranji cricket and IPL also.
- 4) Participation in cultural activities is another criterion so the participation of student in cultural activities increase. Improvement can be seen speaking style in student.
- 5) Taking part in N.S.S. is also criteria it increases social awareness and responsibilities in student.
- 6) Improvement can be seen in college discipline.
- 7) Improvement in interview skill

6) Problem Encountered and Resources Require:

The college run this practice from many years but we have to come across some problems. Sometimes more than one student gets equal score among them selection of one student is a problem university results is main criteria there is increase in result but it is not expected as we decided. Many students do not get

permission from their parents to take participation in sports, cultural activities and N.S.S. so they remain back. All institutions have well infrastructure but the college is located in rural area student comes from surrounded villages they do not have sufficient travelling facilities.

- 7) **Notes:** - The result and performance of students in the examination is the great problem in rural area because of this practice it improved. The practice is all over development of student and they can get benefit in future.

Best Practice – II

1) Title of the Practice: - Guardian-Teacher System

2) Goals and Objectives:

- i) To checkout point to point performance of the students.
- ii) To adhere a personal contact with students.
- iii) To secure a detailed information about the students.
- iv) To look after the problems coming in the way of seeking higher education.
- v) Initiative taken to overcome the problems.

3) The Context:

Holistic development of the students is brought about by imparting need-based knowledge, inculcating values and developing up-skills in order to produce ideal citizens. It is a pious mission of the institution. Equity and transparency in the admission process leads to admitting number of students from divergent sections of the community. Students seeking admission come from very remote places of the rural community. It finds very difficult to check out the overall performance of them since they are large in number. To point out the performance of a student in academic, social, cultural, intellectual basis, the principal allotted 30 students to each faculty and made 10 batches as a faculty-students ratio as 1:30. So each faculty has to look after to only 30 students and checkout the overall performance of only 30 students out of 300. So one faculty finds its quite easy to keep a special attention to his only 30 wards. The faculty has to check out the student's response to attendance, unit test and terminal examinations, his performance in social and cultural activities.

4) The practice:

If a student fails in the attendance, a teacher may contact his / her parents and inform his / her parents about his / her less attendance. This will help to maintain regular

attendance of a student. Personal interaction with students can be maintained. He / she may be counselled regarding, regular attendance, terminal exams, holidays. It leads to the overall performance of a student so that he should do his / her higher studies. Parent teachers individually visited to the student's homes and try to understand their problems, meet with their parents and discuss about progress, interest of their child. Teachers try to counsel the parents about importance of girl's education because most of the parents married their girls breaking their education.

5) Evidence of Success:

In order to make child-parent relationship among faculty and student, the institute practices Guardian-teacher system. Out of total strength, only 10% students are allotted to each faculty, so that one teacher adopts 30 students for their overall performance. A faculty may keep contact personally with his 30 students. The students give a good response to the system. It helps institution for a better attendance of the student. Students feel homely in the institution. He is well counselled so that he may express his problems, his hidden feeling which may stand on hurdles in seeking his / her higher studies.

6) Problems Encountered and Resources Required:

Weak percentage of attendance is a main problem encountered. The students come from economically backward classes of the society. Many students have to seek their daily earnings. They have to do jobs in nearby factories, in their fields and then come to the college. Most of the students have not enough money to take their admissions. The Government gives them scholarship but they fail to maintain their 75% attendance. The Guardian-teacher system aims to promote such students to take admission by paying his / her fee. The faculty may lend some money to his student ward. After seeking scholarship a student will repay to the teacher. Some of the teachers willingly pay the fees or any financial help to their students without repay.

7) Notes:

Guardian-teacher system is a best practice being run in the institution to overcome the academic, economical, social, and even emotional problems of the students, coming for higher studies. Until the student cannot be counselled with all his problems, he may not secure his higher studies. He / she should be attended personally as our child in the institution. So the Guardian-teacher system should be treated as the best practice in the college.
